PROFESSIONAL SUMMARY

Final-year B.Tech student in AI & Data Science who builds things end-to-end — from intelligent backends to polished frontends. Gained real production experience through an industry internship and independently shipped four projects solving real problems. Based in Chennai, open to relocation, and eager to grow as an AI Engineer, Full Stack Developer, or Software Developer in a team that values both craft and impact.

EDUCATION

B.Tech– ComputerScience Engineering (AI & Data Science)

Vels Institute of Science, Technology and Advanced Studies

Expected Graduation: May 2027 | CGPA: 7.5/10

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS

Backend: Node.js, Express.js, REST APIs, MongoDB, FastAPI

Languages: Java, python ,JavaScript

AI / ML: Generative AI, Reinforcement Learning, NLP, Recommendation Systems, Prompt Engineering

Tools: Git, GitHub, VS Code, Power BI, Tableau, Microsoft Excel

EXPERIENCE

MERN Stack Software Intern — BPH Technologies LLP

2026

- Delivered a fully functional user profile module — from requirements gathering through final UI within a live production codebase, with zero rework requested by the team lead.
 - Collaborated daily with senior engineers in an on-site agile environment, following Git branching, code review, and deployment workflows used in production.
 - Accelerated personal ramp-up on the team's tech stack (React, Node.js, MongoDB) within the first week, enabling independent feature contribution from day one.
-

PROJECTS

Intelligent Travel Assistant — Generative AI & Full Stack

- Built a travel platform to find hidden solo-trip destinations and budget homestays, integrated an AI recommendation engine and chatbot for personalised itineraries, and connected Google Maps and OpenWeather APIs for real-time travel data.

AI Trading Agent — Reinforcement Learning

- Built an RL-based trading agent for buy/sell decision-making on noisy market data, focused on strategy optimisation and autonomous decision-making in dynamic environments.

E-Commerce Full Stack Application — MERN

- Built product listing, cart, and checkout features with REST APIs for products, users, and orders, and developed reusable React components for a cleaner, consistent UI.

Law Information Web App with AI Chatbot — NLP

- Built a Law Information Web App with an NLP-driven AI chatbot to present legal fine information in a simple interface and provide instant automated responses, using React for the frontend and Node.js for the backend.
